## 4. Details of interests that **AFFECT** this property

6

Interests below in alphabetical order specifically affect this property but do not appear on the Certificate of Title. For further information and Legislation details, see [www0.landgate.wa.gov.au/interestdictionary](http://www0.landgate.wa.gov.au/interestdictionary).

### **1 in 100 AEP Floodplain Development Control Area**

#### **Responsible agency:**

Department of Water and  
Environmental Regulation

#### **Definition of Interest:**

1 in 100 Annual Exceedance Probability (AEP) Floodplain Development Control Area delineates land that may be affected by the 1 in 100 AEP flooding and therefore subject to development control.

#### **Affect of Interest:**

This property **has been identified** as either being:

- within the 1 in 100 AEPI floodplain; or
- within 300 metres of the floodplain and may be affected by flooding during a 1 in 100 AEP flood.

Please note: Where risk has been identified to a property within this report and construction has occurred on the land, contact your relevant Local Government Authority for management remediation plans relevant to your property, or for properties being purchased off the plan, contact your developer.

#### **1 in 100 AEP Floodplain Areas:**

**Floodplain Development Strategy Area** - Swan River and tributaries (Upstream of the Causeway) - Perth

**Coverage** - DoW - WAWA AF04 & AF05: Swan (Causeway to Walyunga NP); WAWA AF06: Helena (Helena Valley); WAWA BD11: Bennett (Mussel Pool); WAWA AQ38: Blackadder (Swan View); WAWA BI65: Jane (Wexcombe); WRC 3878: St Leonards (Henley Bk); WAWA DD63: Susannah (Millendon)

The Floodplain Development Strategy for the area recommends that proposed development that is located:

- outside of the floodway is considered acceptable with respect to major flooding, however, a minimum habitable floor level of 0.50 metre above the adjacent 1 in 100 AEP flood level is generally recommended;
- within the floodway and is considered obstructive to major river flooding is not acceptable.

There is a 1% chance of the 1 in 100 AEP flood level (or greater) occurring in any one year. Larger floods will occur but will be less frequent.

As some flood risk can be mitigated through appropriate building conditions imposed by Local Government, the relevant Local Government can be contacted to ascertain if the flood risk to this property has been mitigated.

The Department of Water and Environmental Regulation (DWER) can be contacted on (08) 6364 7600 or [flood@water.wa.gov.au](mailto:flood@water.wa.gov.au) for further site specific flood information or see [www.water.wa.gov.au](http://www.water.wa.gov.au).

#### **Affect of Interest:**

The selected area **is impacted** by the risk of mosquito-borne diseases.

Details are as follows:

#### **Mosquito-borne Disease Risk:**

The selected area is in a region that frequently experiences problems with nuisance and disease carrying mosquitoes.

#### **Occasional very high risk**

The selected area is in a region that experiences severe problems with nuisance and disease carrying mosquitoes in some years, depending on environmental conditions.

#### **Frequent high and occasional very high risk**

The selected area is in a region that frequently experiences problems with nuisance and disease carrying mosquitoes, and severe issues are also experienced in some years depending on environmental conditions.

#### **Low or unknown risk**

This location has not experienced high rates of mosquito-borne disease in the past. However, the sporadic nature of mosquito-borne disease outbreaks means that this not necessarily a precise indicator of future risk. Furthermore, regions with low or no resident human population may also be classified as low risk even though there may be an undocumented high risk in the area. Finally, significant mosquito nuisance issues may still be experienced, despite a low health risk.

Residents are advised to avoid exposure to mosquitoes and minimise mosquito breeding around the home as appropriate, particularly following extreme weather events such as heavy rainfall, high tides (in coastal areas) or localised flooding that may create abnormally large areas of mosquito breeding habitat.

For information on mosquito control in your local area or to report a mosquito problem please contact your Local Government Environmental Health Officer.
