

# Notice to Surveyors

## T2/2017

### Landgate support for the recovery of communities affected by Flooding in WA

The recent flooding in WA affecting a large number of local government areas has been proclaimed an eligible disaster under the Western Australia Natural Disaster Relief and Recovery Arrangements (WANDRRA) – AGRN743 Flooding in Western Australia.

Consequently, a range of special support measures are available to the affected communities. Amongst those measures is support from Landgate as described in the information sheets attached and at the Landgate web site.

This notice is to explain to licensed surveyors the support available from Landgate in this situation. Surveyors working in the area who encounter difficulties in re-establishing cadastral alignments caused by the flooding may contact the Team Leader Survey Services, Mario Milos, to discuss the situation.
